

LIFE CHANGING FOR HUSSEIN
MOHAMED and HIS COMMUNITY
MEMBERS

Hussein Mohamed buule, 51 years old is a resident of wabari village, elwak district. He has been living here since his birth; he is married and blessed with 11 children. He's agro-pastoralist and mainly depends on livestock's products as his main source of income to sustain his family.

Initially hussin and his family used to fetch water to over long distances to the water point or sometimes they keep on sharing with neighbor's the little water available to accomplished there need since the village had few water due to scarcity of water in the area which may resulted in migration of livestock to access water. Before intervention of this project our family was known to fetch water from other villages and migration of nomads, today we no longer go out searching for water.

They describe to us that sometime they are a long distances to send their wives and children to look for place were water can be found through in the far village to get water and this has become great challenges and last stubborn and thirst. Generally the family has forced a lot of distress and happens to found them that there life is more complicated and no means of getting water. Sometimes these individuals are rejected by their neighbors who cannot afford to get at least water to sustain their life. The individual's also sometime stay without cooking due to lack of water because they preserve the little water they have to drink.

Until VSF-SUISSE/ NARDO intervenes the situation, this community had been facing countless drawback which have been mention earlier. However after intervention of LLRP III project the community life change and this was testified by hussein.

He started by thanking the involved stakeholders NARDO/VSF-SUISSE for the great work and intervention and added since the rehabilitation of shallow well the situation had change to better and have been improved for all households in the village level. He added, before we use to go inside the forest to look for water to nearby area which sometime loss hope in life or share with our nearby villages or even they refuse to be shared with, but thank and praise be the organization NARDO and I really appreciate the supports, he further, sensed that had improved the life of the community and the improvement and functionality of our only existing shallow well has been rehabilitated and added on that, hygiene and sanitation has also improved and this enhance the community in comfortable life and means of getting water is very much accessible.

Hussein said, the rehabilitation of shallow well has been done successfully and to strategic place for sharing and since it's within our coverage, he profound to take responsibly of purpose taking care for the betterment of his family and the community.

“ Before intervention of this project our family was known to fetch water from other villages and migration of nomads, today we no longer go out searching for water” he quoted,
